Consensus Language

Replace R14-5-202.S.1. with the following language:

- S. Laboratory testing of intrastate pipelines shall be conducted in accordance with the following:
1. If an operator of an intrastate natural gas, other gas or hazardous liquid pipeline removes a portion of a failed pipeline from an incident that requires a telephonic or written incident report under R14-5-203(B) or (C), where the cause of the failure is unknown, the operator shall retain the portion that was removed and shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed. A notice made pursuant to this subsection shall include all of the following:
 - a. Identity of the failed pipeline.
 - b. Description and location of the failure.
 - c. Date and time of the removal.
 - d. Length or quantity of the removed portion.
 - e. Storage location of the removed portion.
 - f. Any additional information about the failure or the removal of the portion of the pipeline that failed that is requested by the Office of Pipeline Safety.

An unknown failure is any failure where the cause of the failure is not observable external corrosion, third-party damage, natural or other outside forces, construction or material defect, equipment malfunction or incorrect operations; or is any failure where OPS and the operator do not agree as to the cause of the failure.

Replace R14-5-205.P.1. with the following language:

P. Laboratory testing of master meter systems shall be conducted in accordance with the following:

1. If an operator of a master meter system, other gas or hazardous liquid pipeline removes a portion of a failed pipeline from an incident that requires a telephonic or written incident report under R14-5-203(B) or (C), where the cause of the failure is unknown, the operator shall retain the portion that was removed and shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed. A notice made pursuant to this subsection shall include all of the following:

- a. Identity of the failed pipeline.
- b. Description and location of the failure.
- c. Date and time of the removal.
- d. Length or quantity of the removed portion.
- e. Storage location of the removed portion.
- f. Any additional information about the failure or the removal of the portion of the pipeline that failed that is requested by the Office of Pipeline Safety.

An unknown failure is any failure where the cause of the failure is not observable external corrosion, third-party damage, natural or other outside forces, construction or material defect, equipment malfunction or incorrect operations; or is any failure where OPS and the operator do not agree as to the cause of the failure.
